

Sprint 2 Report

Product Name: Vision Studio Spatial Layout Engine

Team Name: Vision Studio

Date: May 4, 2026

Actions to Stop Doing

As a team, we'd like to stop rescheduling meetings last minute. On the code development, our team is completely satisfied with the current practices because we've worked hard to complete all components of sprint 2.

Actions to Start Doing

For general practices, our team would like to be more proactive with planning and improve communication and responsiveness

For coding, our team is planning to make a pr for each task we complete so we can track progress with each commit

For scrum practices, we'd like to make meetings more efficient and have goals/an agenda every time we meet

Actions to Keep Doing

Our team will continue to work at the pace we're comfortable with and meet regularly, following scrum good practices, we'll complete all documentation together and communicate with each other and with the TA if issues arise.

Our team will also continue to track progress through github projects and make sure everyone is submitting issues and coding changes

Work Complete/Not Completed

Work Completed:

- Redesigned and built the editor workspace UI (page layout, sidebar tools, top toolbar) with consistent styling.
- Built room editing controls with draggable wall points, resize dimensionals tool, and live dimension labels on walls, including scaling and wall alignment.
- Built and refined AI chatbot interface to allow users to chat with the bot to adjust room layout, describe room goals, and get style guidance.
- Built post-upload confirmation page showing a preview, dimensions, and project description summary
- Implemented save/load for user projects onto Supabase Postgres so users can return to their existing projects.

Work Not Completed:

- N/A

Sprint 2 Work Completion Rate

100%

Total number of user stories completed: 5

Total estimated number of work hours: 24 hours

Total number of days: 14 days

User stories/day: $5 \div 14 = 0.36$ user stories per day

Work hours/day: $24 \div 14 = 1.71$ hours/day

Cumulative average user stories/day: 0.32 user stories/day

Cumulative average hours/day: 3.0 hours/day
